A journey of multiple industries and multiple disciplines.

I have had the pleasure of working with exceptional talents from whom I have learnt a great deal that has been crucial to my personal development during my well over three decades engaged in various industries and my own businesses.

*Disciplines covered

*9 years in Tendering - Estimating and Cost Engineering

*4,5 years in Contract Management

*1.5 in Project Engineering

*3 years in Project Management

*10 years in Mechanical Services Consultancy HVAC (Includes all main disciplines plus)

In addition - Business Analyst and Mechanical Engineering

My ultimate ambition is to use my rich experience of selected discipline to give back to the industries through our VQ Logic *Innovative Training modules*.

The main reason for developing VQ Logic was to ensure compliance and quality while organizing daily project duties. Our clients are enabled to achieve more with less effort and automatically transform accountability into compliance, adding extra layers of transparency.
